

TO WHOM IT MAY CONCERN

This book was prepared for Industrial companies that assemble and test products in series production and are interested in manufacturers of individually tailored as well as standardised turnkey assembly & automation systems or turnkey test systems in China.

AT A GLANCE

- The long list covers **more than 70 companies**
- About 25 companies were **visited on site**
- The auditing was carried out according to **VDA 6.7**
- Assessment of technical & quality capability

published by Forum China, Dirk Meyer, dirk.meyer@forum-china.de

MARKET SEGMENT

Manufacturers of turnkey assembly systems with process integration.

Technologies for integration: e.g. welding, soldering, gluing, testing, ...

System integration: e.g. joining, linking and feeding technology, robot assembly systems

Product segments that are manufactured on these systems: Mechanical, mechatronic & plastic components, electronic control units (ECU), assembly of printed circuit boards (PCB) for industries like **automotive, medical, electric** and **consumer**.

TABLE OF CONTENT

Executive Summary

Company Profiles e.g. core competences, realized projects, customers...

Key Figures e.g. machinery, design tools, pm tools, ERP, certificates..

Pre-Selection & Audit e.g. project management, sourcing, production...

Assessment of Quality Capability

Assessment of Technical Capability

Scope of Equipment Production

EXECUTION

Period of site visits: Mainly from 2015 to 2018

Accomplishment: About **280 man-days** including research, contacting, preparation of the visits, travelling, conducting the visits and evaluating the results
