

TO WHOM IT MAY CONCERN

This book was prepared for Industrial companies that are interested in manufacturers of individually tailored as well as standardised turnkey assembly & test automation systems in China.

AT A GLANCE

- The long list covers **more than 80 companies**
- 58 companies were **visited on site**
- Assessment of technical & quality capability by industry experts with **extensive audit experience**
- Regions in Focus: Tianjin, Shanghai, Pearl River, South East, Central

MARKET SEGMENT

Manufacturers of turnkey assembly systems with process integration.
Technologies for integration: e.g. welding, soldering, gluing, testing etc.
System integration: e.g. joining, handling, linking and feeding technology, robot assembly systems
Product segments that are manufactured on these systems: Mechanical, mechatronic & plastic components, electronic control units (ECU), assembly of printed circuit boards (PCB) for industries like **automotive, medical, electric, new energy, medical and consumer.**

CONTENT

Executive Summary

Company Profiles e.g. core competences, realized projects, customers...

Key Figures e.g. machinery, design tools, pm tools, ERP, certificates..

Evaluation e.g. project management, sourcing, production...

Assessment of Quality Capability

Assessment of Technical Capability

Scope of Equipment Production

EXECUTION

Team: Industry experts with **extensive experience in auditing** suppliers of assembly & test automation systems

Period of site visits: Mainly from 2016 to 2018

Accomplishment: Approximately **280 man-days** including research, establishing contacts, preparing and conducting the visits, assessment of all data, observations and discussions
